Creating Strong Passwords

Strong passwords keep the data you share online safer. Follow these tips to keep your online accounts secure.

Consider using a password manager like LastPass, 1Password, or KeePass to track all your passwords.

Avoid passwords that could be easily guessed like a family member or pet's name.

Don't reuse the same password on multiple accounts.

Avoid common passwords like those listed below.

Most Common Passwords in 2020	
123456	1111111
123456789	12345678
qwerty	abc123
password	1234567
